

You have had a great Spring and Summer
and now it's time to take it to the next level!

When thinking about
your infrastructure,
the sky is the limit!

Our construction team assists, with all aspects of greenhouse planning, construction and maintenance. Whether it's a new operation or expansion, upgrades or replacements, we can help with options to meet your needs and fit your budget.

If you build it, they will come!

Your greenhouse and overall infrastructure is an amazing investment and is the best way to extend your growing abilities. Spring and Summer of 2021 has turned into an exceptional year for growers, and we all have seen an increase in profitability.

Slowly but surely, the economic landscape has started to brighten. If you are thinking about investing in equipment or expanding your existing greenhouse, now is the time to take advantage of the improved economy and start thinking about how and what you need to do to maintain a competitive advantage. Many will need to increase production, which for many means increasing growing space. Griffin's Construction specialists and equipment team have had tremendous success in helping greenhouse operations understand where government tax incentives can help you in your process. If investing in a new equipment, lighting, new construction of a greenhouse, or retrofitting your existing structure, now is the time.

Seeking professional assistance and guidance from a tax professional is strongly recommended.

Greenhouse upgrades worth considering:

#1 Replacement or upgrading benching

Increased growing space can be obtained by upgrading your benching system. The right bench system can save you money and improve overall efficiency.

#2 Irrigation

Maybe hand watering may not be eliminated completely you can save hours of labor time by upgrading to a modern irrigation system.

#3 Material handling

It may be that investing in equipment will help improve the way you handle materials. Equipment is available for all size growers.

#4 Fans or Proper Ventilation

Yes, greenhouses need proper fans and ventilation to keep your plants healthy.

#5 Lighting

Thinking about lighting? Now is the time to act and Expand Your Season! After a strong season, many growers turn their thoughts to infrastructure improvements. Proper lighting brings strong quality benefits for flowering crops and is critical for year-round production of flowers and young plants. We have great options for HPS, MH, and LEDs. Some utility providers even offer incentive programs for some types of lights.

#6 Greenhouse replacement considerations

If you have an existing wood frame greenhouse or an old hoop greenhouse, they can be very inefficient relative to space, labor, and energy.

Griffin's construction specialists can help you evaluate the many alternative systems available for either freestanding, gutter-connected greenhouses, lighting, or equipment.
